

Annual Preventive Blood Testing

Your pet is an important member of the family, and we want to ensure that your pet stays healthy. Annual blood testing allows us to detect disease, often at an earlier stage, when it may be easier to treat. Ask about our packages today!

Junior Package

(Ages 1-6 years)

CBC - Evaluate red blood cells, white blood cells & platelets.

Mini-Chemistry - Vital information about internal organ function (liver, Kidneys, blood sugar)

Fecal - Evaluates for intestinal parasite eggs that could infect your family (substituted with routine de-wormer for cats)

Heartworm Test - Evaluates for a potentially fatal heartworm infection (FELV/FIV test if needed for cats)

Cost: \$150 (value \$185-\$195)

Senior Package

(Ages 7+)

CBC - Evaluate red blood cells, white blood cells & platelets

Complete Chemistry – Larger panel than mini-chem - information about internal organ function (liver, kidneys, pancreas, blood sugar, hydration, etc)

Thyroid - Abnormal thyroid levels are more common in senior pets causing weight loss/gain & other issues

Urinalysis – monitors for kidney health, infections, and signs of diabetes

Fecal - Evaluates for intestinal parasite eggs that could infect your family (pyrantel de-wormer for cats)

Heartworm Test - Evaluates for a potentially fatal heartworm infection (FELV/FIV test for cats)

Cost: \$275 (value \$315-\$325)

Other permutations of these packages may be recommended for your pet depending on their age/health status at the time of their visit.
